

I General information about MyHealth@EU

What is MyHealth@EU?

MyHealth@EU, also called the eHealth Digital Service Infrastructure (eHDSI) enables safe and easy access to your health data for healthcare professionals involved in your treatment and the provision of medicines - anytime and anywhere within the EU. This is done by electronic means through secure gateways provided by National Contact Points for eHealth (NCPeH) designated by each country.

Each country identifies which organization assumes the responsibility as a data controller for the processing of your data, as this is subject to the country's legislation.

See the last page for information specific to this country.

Which categories of your personal health data can be accessed?

1) Patient Summary – the most important information about your health is collected from the country where it is stored, such as your home country, in order to use it for your treatment in another country. The patient summary includes information on important patient data such as allergies, current medication, previous illnesses and surgeries that are necessary to treat you properly abroad *<link to the list of data categories that are being processed in the scope of the service>*.

2) Electronic prescription and dispensation - you can get a prescription for medicine from a healthcare provider in one country and receive medication through a pharmacy in another EU country. The electronic prescription contains essentially the same information as a regular paper prescription, i.e. identification of the prescriber, the patient and the medicine prescribed. The electronic dispensation includes information about the medicine dispensed. This information will be sent by the pharmacy back to the country that issued the prescription *<link to the list of data categories that are being processed in the scope of the service>*.

3) Laboratory Results - clinical documents containing the results of laboratory tests, stored in the Country of Affiliation.

4) Imaging Reports - clinical documents containing the reports on images studies and, when requested, the images (e.g. in DICOM standard), stored in the Country of Affiliation.

5) Discharge Reports - clinical document generated by the healthcare provider where the patient was treated, both as an inpatient and an outpatient, which gathers the main findings, stored in the Country of Affiliation.

6) Original clinical documents – original documents containing your health information, such as laboratory results, hospital discharge letters, and medical images. *<link to the list of data categories that are being processed in the scope of the service>*

This personal health data is available in so far as it is already recorded in electronic form in your home country.

The source(s) of this data varies from country to country.

See the last page for information specific to this country.

What is the legal basis for the use of your personal data?

The MyHealth@EU services will become available for you depending on the conditions set individually by each country.

When you receive treatment or medicine abroad, your data will be recorded in the country of treatment (or medicine dispensation) according to the EU General Data Protection Regulation, the national legislation of that country and the internal rules of the particular healthcare provider.

Emergency situations may justify the use of your data for your treatment without your consent.

See the last page for information specific to this country.

What is the purpose of the processing?

The primary purpose for processing your health data is your medical treatment or provision of medicine. However, due to the national legislation of each Member State, there may be additional purposes.

See the last page to check if such additional purposes are applicable to this country.

Who processes and has access to this data? (recipients of personal data)

Your personal data will be accessible by authorized and identified health professionals involved in your treatment or provision of medicine under professional secrecy.

These are health professionals in the healthcare organization where you receive your treatment or the pharmacy where you receive your prescribed medicine.

There are also other entities, such as the National Contact Points for eHealth, that process your data to ensure its secure transmission to and from this healthcare organization or pharmacy, logging, or other related activities.

The list of data processors is indicated on the last page.

Where and for how long is the personal data stored?

The collected personal data may be stored in the information systems of the health institutions both in your home country and the country of treatment or dispensation of medicine.

The data shall be stored for no longer than is necessary for the purpose for which your personal data is processed.

The storage period(s) in this Member State is indicated on the last page.

What are your rights and how to exercise them?

You have the right access to your personal data.

Apart from that, you can exercise the rights of rectification, erasure, restriction of the processing and data portability.

In order to exercise your rights, you may contact us.

Contact details are available on the last page.

Also, you have the right to lodge a complaint before the supervisory data protection authority.

The list of the national supervisory authorities can be found at https://edpb.europa.eu/about-edpb/about-edpb/members_en.
